Dear Hiring Manager,

I am writing to express my interest in the position of **Junior Penetration Tester** at your esteemed organization. As a passionate and **self-taught cybersecurity** enthusiast with **real-world bug bounty experience on platforms like HackerOne and BugCrowd.** I bring practical skills and a deep curiosity for ethical hacking and vulnerability analysis.

Since completing my Class 12 with Science, Math, and Computer Science in 2024, I have dedicated myself full-time to strengthening my knowledge in cybersecurity. I have hands-on experience with tools such as **Burp Suite, Nmap, Nikto, and Gobuster** and have successfully identified vulnerabilities like **XSS, IDOR, SQL Injection, Remote Code Execution and Security Misconfigurations** in live environments.

In addition to bug hunting, I have developed scripting skills in Python and Bash to automate security tasks, and I possess a solid understanding of **OWASP Top 10 vulnerabilities** and their mitigation strategies. I also regularly engage with platforms like TryHackMe and HackTheBox to refine **my technical abilities and stay updated on the latest security trends.**

Though I am yet to gain formal job experience, my proactive learning, practical exposure, and strong problem-solving mindset equip me to contribute effectively to a **cybersecurity team**. I am eager to join a professional environment where I can learn from experienced mentors, add value to your security initiatives, and grow with your organization.

I would be grateful for the opportunity to discuss how I can contribute to your team. Thank you for considering my application.

Sincerely,

Aman Singh
